June 2016

WHEELS

WHEEL NUTS 28-31

01012BC \$4.00 ea Chrome
01012BST \$4.80ea Cadmium
Aug 1927-1931.

Torque wheel nuts 64 ft lbs

WHEEL NUTS STAINLESS 28-31

01012S \$6.90 ea
Polished to a bright finish. If you glass bead these nuts, they will look like cadmium. Save money use Stainless as sooner or later plated ones will peel. Best value for money is stainless.

STAINLESS SPACERS WHEEL LUG WASHERS 28-31

01012WS 70c each*

These cone-shaped washers correct worn and oversized bolt holes in the wheels. To protect paint as you tighten wheel nuts.

AA TRUCK WHEEL NUT REAR 1930-70 LEFT HAND THREAD

01135B \$11.00ea

AA TRUCK WHEEL NUT REAR 1930-70 RIGHT HAND THREAD

01134B \$11.00ea

SPOKE STRAIGHTENER SET 28-31

Good item for keeping spokes in good shape 01015SP \$189.00

GREASE CAP

Drive in, for front hubs 28-31
01138 \$1.50*

REAR HUB 28-31

01115 \$298.00*ea
strong ductile steel, machined and ready to receive new drum and five studs and bearing.

FRONT HUB 28-31

01105 \$242.00* ea

strong ductile steel, machined and ready to receive new drum, five studs and races.

FRONT HUB BOLTS 28-31

01107 \$1.50 *each
Machined high carbon steel. These original style 1/2-20 threaded bolts swedged in place.

REAR HUB BOLTS 28-31

01118 \$1.50 *each
Machined high carbon steel, swedged into place. The bolt shoulder is 1/16 longer to accommodate the 1/16 thicker new drum.

HUB STUD SWEDGING TOOL

01119 \$20.00 ea
After placing the hub bolt through the drum, this tool can be used to swedge the shoulder of the stud to the drum 20 ton press required.

If your drums measure 11.070 inches inside diameter or .110 of an inch thick, then they are worn out and should be replaced. Our Drums are made of ductile Steel **2 times stronger than Cast Iron.**

1928-31

FRONT BRAKE DRUM

01125 \$180.00*ea
New drums. Less hubs and hub bolts. Inside drum diameter of a new drum is 11 inches

REAR BRAKE DRUM

01126 \$186.00*ea
New drums. Less hubs and hub bolts. Inside drum diameter of a new drum is 11 inches

BRAKE DRUM BANDS 28-31

01128 \$78.00 ea
Heat & shrink onto brake drum will help to stop distortion on brake drums needing replacement. Ensure outer surface is clean of paint etc before fitting.

Hub Cap Anti Rattle

1928-31 Hub Cap Rubber seal

01130BC 28-29 6pc \$8.00

01130GS 30-31 6pc \$8.00

HUB CAP STAINLESS 28-29

01130 \$27.00each

HUB CAP CHROME 28-29

01130BC \$23.00each

REAR WHEEL HUB PULLER 28-48
ideal for removing rear hubs. Most
important tool all clubs should have
one for members to use.

04238 \$460.00

WHEEL BEARINGS

Check your bearings thoroughly
for cracks, pitting or scores.
Clean them using a solvent. It is
recommended that you replace
your bearings since they are usually
worn out. This is a good safety
measure if you drive on regular
club runs. Use a good grade of
Grease and dont be afraid of using
to much ! Also neoprene grease
seals should be coated with grease
before installation to lubricate the
seal for improved efficiency.

Re Freight from overseas destinations suppliers

It is an expensive business sending
goods to NZ from overseas.
Sea Freight is a less initial cost
but landing at NZ very high addi-
tional port, customs charges.
Sea is usually 8 weeks door to
door, Airfreight is 10 days, Airpost
is 10-20 days. Combining bulk
indents for clients has been most
beneficial for large orders.

Same as above less king pins 1928-48
03111X \$99.00*

KING PINS ONLY SPINDLE SET

03111KP \$80.00*

KING PINS / Spindle

When connecting the brake lever to the socket or cup of the king pin. Check that the lever moves freely by moving the brake rod clevis back & forth. If you feel a drag or binding, the king pin bolt cup may not be aligned to the end of the lever shaft. This can be corrected by filing the cross cut in the king pin bolt shank to change the angle for the cup to seat to the lever shaft.

14404 \$44.00 ea

REAR AXLE

REAR AXLE PINION PULLER 1928-1931 04210P \$138.00

Rear Axle helpful hint

Its always smart to check the internal parts of the rear end periodically. After removing the rear spring unbolt the passengers axle housing this will allow for the removal of both axels. To remove the axle with ring & pinion you only need to remove the ten bolts on the passengers side. Slide off the housing and pull the axels with ring and pinion attached out. Always use new gaskets and seals when replacing.

DIFFERENTIAL FILLER & DRAIN PLUG 1928-1948

One or two

04030 \$2.00 each

REAR AXLE GASKET 1928-1931 .016

04035 \$2.60each

REAR AXLE GASKET 04035A \$2.60each .010

REAR AXLE GASKET .006 04035B \$2.60each

To help get the correct backlash between pinion and ring gear, gaskets must be added or deleted from each side. Read Rear End Overhaul in How to Restore your Model A Volumes 2 & 6 used 1928-32, see books for sale in this issue.

NOTE

Soak gasket in hot water for a minute or two. The water resizes paper to its original size so it can be installed easier.

works. No exhaust leaks with this.

MUFFLER CLAMP STEEL
05251 \$30.00
This one from original
design works and seals
with our muffler without
any sealant. BEST.

**MUFFLER CLAMP BOLTS
PAIR 28-31**
05251BS \$4.00

MUFFLERS

Please note to make the flange end seal
on the Manifold you must have the
correct muffler flange end. The USA end
will fit neat and snugley and no sealant
is required using our 05251 clamp for a
no leak seal. Do not use an incert inside
the flange end as this will decrease the
horsepower. Use only original Henry bits
which fit and seal as they were made to.

Muffler 28-1931, correct shape for fitting.
05320 \$358.00 USA original genuine
take care and buy genuine USA made for
long lasting no blow outs and correct
sound as a Model A should sound like.
Nothing matches the genuine USA made
copies are not good enough quality.

HIGH HORSEPOWER MUFFLER in
store also. Not suitable for standard
Model A.

This is a genuine high HP Model A
muffler similar shape and size to the
on the 80+HP. USA import genuine.

06340B \$20.00set

After installing the timing gears, slide a feeler gauge between the fiber and steel teeth. The backlash should be between .003-.005. Double check that the timing marks line up on the crankshaft and camshaft gears. If you are getting excessive backlash with your fibre gear go to an oversize gear. The 2 dowl pin holes are off centre. If the gear will not slide on the dowel pins entirely, rotate the gear 180deg for a proper fit. Be wise and change both the Crank and Camshaft at the same time.

TIMING GEAR 28-34

OIL

Engine oil capacity is 5 quarts. However when changing the oil you will not be able to drain all the oil.

Some will remain in the connecting rods dipper tray. Adding 5 quarts of oil may cause a leak at the rear main baffle. 4 1/2 quarts should be enough.

Prices Subject To Change Without Notice.

Page 19

MODEL A ENGINE REBUILT

All fully rebuilt engines are offered as bench tested before they are dispatched. The Engine and parts sent must be in a suitable rebuildable condition if not a core fee will apply for each non rebuildable component if available. Engines must be supplied empty of oil. Henry never build A Leakless A engine or T* today we have now got the A engine sealed with the utmost care however nothing is 100% leakless.

Rebuilt your Model A Engine (STOCK No1)

This Engine is supplied as a fully rebuilt unit with head and block surface ground, new head studs & nuts, rebored with new pistons and rings, crankshaft ground and fitted with shell bearings on both big ends and mains. We fit hardened exhaust valve seats, new modern style valves in single piece valve guides with adjustable valve lifters. Finished in correct ford colour scheme. Engines are re-assembled bench tested and returned to you ready for you to refit your own carburettor, distributor and electrical components. **\$6360.00 plus GST ex our store.** (Crank and Clutch balance add \$400.00 + gst)

Rebuilt your Model A Engine (No3 High Performance Touring)

Again a fully rebuilt engine, surface ground head and block, new head studs & nuts, rebored with new pistons and rings. But fitted with brand new fully counterbalanced crankshaft, running in shell bearings, brand new con rods again with shell bearings, New performance camshaft, (giving better performance and improved economy) new modern style valves in hardened exhaust seats, including large inlet valves for better breathing, adjustable lifters, modern crankshaft rear oil seal. Brand new improved flow oil pump, flywheel lightened, machined and fitted with a new clutch plate and new V8 style pressure plate. Engine balanced. finished in correct Ford colour scheme. Engines re assembled, bench tested and ready for you to refit your own carburetor, distributor and electrical components. **\$11,000.00 plus GST ex store.**

All above are suggestions, many variations for particular requirements are available all based on suitable core or additional fee applies. Ask for a price.

* Extreme care is undertaken to minimise all oil leaks a Model A is not a Toyota.

Warranty agreement is accepted for all work ensure you are familiar with ours.

We warrant against faulty parts and workmanship for 3 months from completed work. Customers must remove and forward Engine to Napier for any inspection for a warranty claim. You want more power from your new or good running engine; Higher compression Anderson Head and bigger carburetor are the two easiest and most important paths for power and speed. Talk to us we have the experience on Engines and power. We actually test many of our speed /power suggestions so do know from practical experience what is successful and what is not. Remember so called high compression heads can be a waste of money take care and choose the right one to get the desired effect. Larger Carburetor may not be the answer either, talk to us advise is free. Power and economy go together, Our Overdrive is an added bonus with economy and highway speed.

06766P \$18.00 P.Coated
06766 \$7.30 steel

OIL BREATHER SS (A & B ENGINE) 28-31

Excellent item to allow your engine to breath better used standard on the B Engine

SS Filer tube & Top A or B Engine
\$325.50

This is the best unit available to make youe engine breathe correctly from the sump.

SUMP OIL PAN GASKETSET A ENGINE 27-31; tighten up to 5lbs only.
06781 \$7.00*

Installing oil pan gasket can be done by applying a thin coat of high tack sealant to the block on one side of the gasket. Let it tack up for 15min, then instal the gasket to the block. The gasket should touch the edge of the front rope packing. Then apply a little more high tack at the end of the cork against the rope to seal that area. Torque to 5-6 lbs if gasket starts to squeeze out you have over torqued the bolts and it will leak.

if available.

Tip to install. Lay the socket face down and take about a 1/8" diameter punch and go around the backside of the socket lightly tapping the stainless outer piece tighter against the crimped edge where the brass slips into it. This seems to work well and keeps them from coming apart during installation.

Torque measurements are in foot-pounds.	
The following is a guide for torquing the different fasteners. Remember, if original fasteners are used, their tension loss is unknown due to the number of times they have been reused. Therefore, the torque measurement might need to be adjusted. It is recommended to use all new fasteners. See Nuts and Bolts article in <How to Restore Your Model A. Volume 3>.	
	LB
Axle housing to differential	35
Camshaft nut	100
Connecting rods	45
Cylinder Compression on NEW engine	64
-The cylinders should not vary more than 7 pounds between cylinders.	
Flywheel	55
Head	50-55
-Torque up in three stages using correct sequence with final torque after engine is hot. See part 06051 for torque sequence	
Main bearing cap bolts	70-80
Mainfold - exhaust	30-35
Oil pan	15-25

Rear axle shaft nut	100
Timing cover	25
Torque tube to differential	35
Valve cover	15-25
Water inlet	40
Water neck - torque with caution	50
Wheel lug nuts	50-55
What is Raven Finish? This is a dark dye mixed with oil. This is a temporary finish and will begin to rust within a few months after installing, unless it is sealed by spraying by spraying with a clear coat or painting black.	

Shelsley Engine Oil Penrite Oils

Is a low detergent range of engine oils intended for vehicles manufactured between 1920-1950.

Shelsley Light, for vehicles specifying a light grade oil or SAE 20 or 30.

5L \$51.30

Shelsley Medium, vehicles originally specifying a medium oil (25w-70)

5L \$49.00

Classic Medium Oil

5L \$51.30

SIN RACE CASTOR OIL

1 litre \$28.50.

Pro Gear Oil 75-90 1Lt \$23.20

Running in Oil,

is designed to promote and control the bedding in process of newly rebuilt engines. It should be used for the first 300 miles and then replaced with the appropriate grade HPR or Shelsley Oil.

5L \$45.13

Upper Cylinder & LPG lubricant

Can be added to petrol tank to provide upper cylinder lubricant and control combustion chamber deposits.

1L \$11.00

HERITAGE OIL

Heritage MTH

Is a medium to heavy viscosity engine oil designed to meet the requirements of medium to large veteran, edwardian cars and motorcycles of 500cc capacity or over built prior to 1920. Typical oil change intervals should not exceed 500 miles or yearly whichever comes first.

5L \$51.33

STEERING BOX OIL

Steering Box Oil Lube

used in veteran and vintage motorcycle and car gearboxes, steering boxes many other uses for heavy nonleakage. 450g \$12.00

CAMSHAFT ASSEMBLY LUB 40g

05222 \$6.50 each

Gear Box

Rear Axle - Transoil,

straight or non-additive treated oils are suitable for use in either straight bevel, spiral bevel or worm gears.

Trans Oil 90, suitable for gearboxes and rear axles of small and medium sized vehicles from 1920s and 1930s. Recommended also for Luvax shock absorbers.

1L \$11.10

Transoil 140, the equivalent of what was called 120, 140 and 160 grade. For gearboxes and axles of medium to large size 1920s and 1930s cars.

1L \$10.00

600W

Transoil 250, The heaviest of gear oils equivalent to what was known as the **600W** or steam cylinder oil. Ideal for veteran and edwardian rear axles where gearbox may require thick oil

1L \$18.00 = **600w**

Gearbox Oil, For use where oils of 30 and 40 SAE rating were originally recommended. Suitable for older boxes of either straight cut, synchromesh, epicyclic design, or for overdrives such as (laycock), both oils contain no EP additives which can cause serious damage to gearboxes containing yellow metals or friction modifiers which can cause slipping in overdrives and pre-selector gearboxes.

Gear Box Oil 30 1L \$11.00
replaces SAE 30 and 20w-50

Gear Box Oil 40 1L \$11.00
replaces SAE40.

Mild EP Gear Oil an SAE 90/140 grade gear oil suitable for use in bevel worm and pre 1960 hypoid gears. Rated GL-4 this oil does not have the additive package found in later GL-5 gear oils which should not be used in veteran and vintage vehicles as the additives can attack the metals such as bronze, brass and copper.

1L \$15.00

Hypoid 80w/90 gear oil. Heavy duty.

1L \$15.67

GEAR OIL 80w-90 1L

Limitation of Liability

In the event of any item sold or agreed to be sold by Roger Anderson Ltd trading as Model A , T V8 Parts or other trading names of Roger Anderson Ltd not complying with the express terms of the contract of sales, or any part being proven defective we will at our option replace the defective item free of charge to the buyer or will refund all payments made to us in respect of the defective part. This shall be the limit of our obligation. We hereby exclude all liability for any loss or damage arising from the use or intended use of any such item sold or agreed to be sold or repaired or reconditioned. The price of these goods would be far greater if a more extensive liability were required to be undertaken by us. On all sales the obligation is on the purchaser to ensure all items are what they require and are suitable before use. We do not insure items in transit this obligation is for the purchaser. We can insure items if requested to do so prior to dispatch.

All sales are made on this basis which are accepted by all buyers when placing orders and purchasing our items.

We do not offer accounts as such all Invoices are on the basis of prepaid prior to delivery. Account holders are frequent users and trade people. These are paid within the month of purchase any overdue past this interest is charged at 10% per month, debt recovery costs are the buyers expense.

Special Indent orders are a big part of our business and we do not accept back any part wrongly ordered. It is the responsibility of the purchaser to ensure what they are ordering is correct, please take care when ordering on indent.

Tyre indents are prepaid prior to ordering so please make sure that you order correctly as Tyres are not returnable for wrongly ordered items. Some modern Tyres are liable for Duty and may be payable on and above the offered price for modern style tyres. All tyres are sold outright and use of Tyre on the road invalidates any warranty, any fault must be advised prior to road use. Warranty on Tyres is strictly limited and freight costs are additional in claims all subject to USA Tyre manufacturers acceptance of any claim if any. We indent on a regular basis and usually is best to combine orders with others at our side to reduce the overall freight cost where possible.

Freight- Insurance

All items of normal size will be sent by Courier Post at cost. Rural delivery cost is extra at cost. Insurance is covered by the buyer, we can cover the insurance if requested to do so prior to dispatch. All Indents are the buyers responsibility to insure.

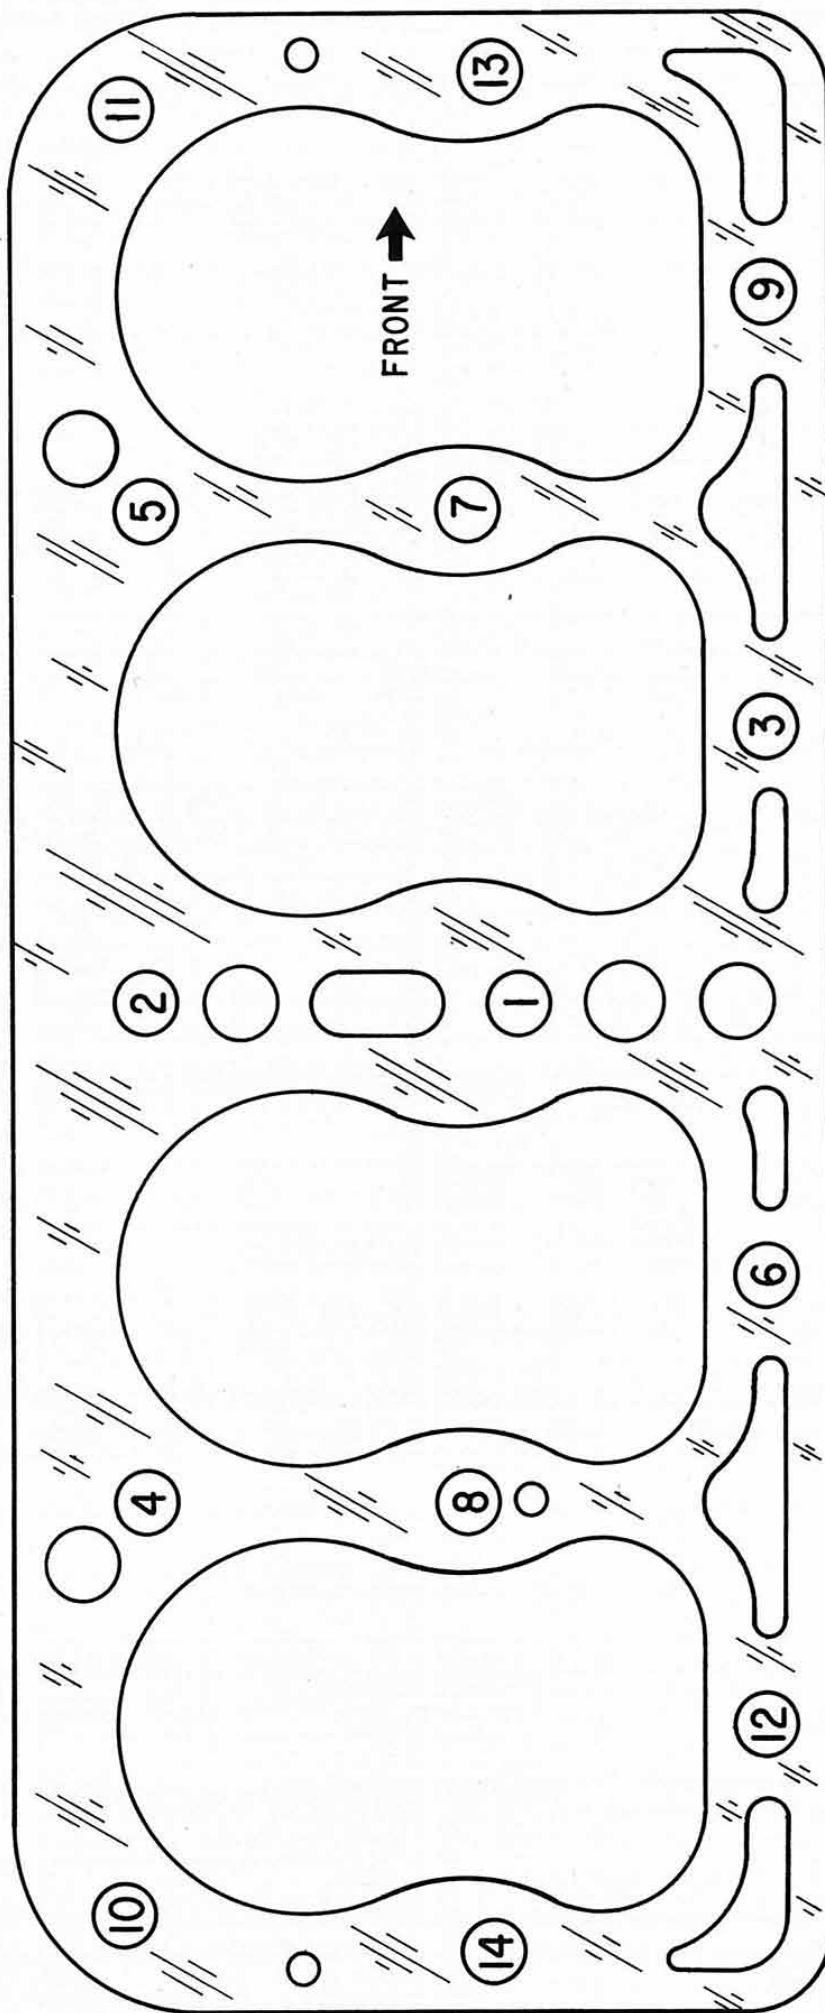

Shop Hours, Internet & Online or Fax or Phone ordering

Shop visit is from 9am to 2.30pm phone orders 24 hours a day 7 days a week, all orders are paid for at ordering time either by Chq, Cash, direct deposit or credit card by way of mastercard. All orders ordered via the on line Web ordering at our Web site or Email ordering of Phone or Fax Orders and paying direct into our bank account as Roger Anderson Ltd , BNZ Napier 020700.02847147.00 (it is essential all payments are clearly identified).

Payment

Payment can be made Direct which is more convenient for us details below. All items are prepaid before dispatch. Indents payment required on ordering for the goods, freight charge on arrival. Direct Banking Information. You must put your Name on payments, we must be able identify payments so please take care to correctly name your payments. We do not operate accounts. Roger Anderson Ltd BNZ Napier 020700: 0284147.00 (direct payments to bank is great) Credit card payments, Visa, Mastercard credit card plus.

RECOMMENDED SEQUENCE TIGHTENING CYLINDER HEAD NUTS ON THE MODEL A FORD

Torque head to 35lb in correct sequence as shown in diagram. Torque again to 45lb then a final torque to 55 lbs. Take special care on water outlet goose neck as easy to crack this fitting. A paper gasket will help.

1LM12

Ideal low pressure pump for Model A silent or as near to, suitable for inside car application or within the engine bay.
12volt negative or positive earth. 1litre per minute max fuel usage, operating pressure 2-3psi diaphragm pump
Excellent no noise Model A Fuel Pump

The ECCO™ 1LM12 Diaphragm Pump is loosely styled on the original SU type electric fuel pump. It is a universal replacement fuel pump and has been specifically designed to suit as wide a scope of applications as possible. The 1LM12 Diaphragm Pump would generally be used as a replacement fuel pump on carburetted vehicles that have 4 – 6 cylinder engines and a fuel requirement of up to 1.0 Litres per minute. Typically, these vehicles could be described as your normal family-sized car with small to mid-sized engines of up to 2.0 Litres.

Diaphragm Type Electric Fuel Pump Product Specification Chart

- Part Number 1LM12
- Application Universal and SU Replacement (most engines up to 2.0 L)
- Voltage 12 volt
- Earth Negative or Positive
- Operating Pressure (Psi) 2 – 3 psi
- Max. Flow (Nominal) 1.0 litre/minute
- Dry Prime Immediate fuel delivery
- Dimensions 13(L) x 8.5(W) x 8.5(H) cm
- Weight 0.574 kg
- Filter In-built 50 micron filter & magnet assembly

15LM12

12 volt positive or negative earth
1.5 litres per minute flow 3-4 psi.
self regulation diaphragm pump.

Replacement pump for SU AUF 300/AZX 1300 series pumps

Specifications

- 12 volts
- Positive or Negative Earth
- 1.5 litres per minute flow
- 3 – 4 psi
- Self Regulating
- Solid State Electronics

The ECCO™ 15LM12 Diaphragm Pump is loosely styled on the original SU type electric fuel pump. It is a universal replacement fuel pump and has been specifically designed to suit as wide a scope of applications as possible. The 15LM12 Diaphragm Pump would generally be used as a replacement fuel pump on carburetted vehicles that have 4 – 6 cylinder engines and a fuel requirement of up to 1.5 Litres per minute. Typically, these vehicles could be described as large cars with larger than average engines and a higher than normal fuel requirement.

LM102

Diaphragm pump 12 volt. Universal and SU replacement. positive or negative 1-2psi (low pressure pump)

The ECCO™ FUELFLOW LM102 Diaphragm Pump is loosely styled on the original SU type electric fuel pump. It is a specialist low pressure replacement fuel pump and has been specifically designed to suit vehicles that operate a low pressure fuel system. Although this pump is used in a wide range of applications it is typically used in vintage cars and most commonly the Morris Minor.

Diaphragm Type Electric Fuel Pump Product Specification Chart

- Part Number LM102
- Application Universal and SU Replacement
- Voltage 12 volt
- Earth Negative or Positive
- Operating Pressure (Psi) 1 – 2 psi (low pressure pump)
- Max. Flow (Nominal) 1.0 litre/minute
- Dry Prime Immediate fuel delivery
- Dimensions 13(L) x 8.5(W) x 8.5(H) cm
- Weight 0.574 kg
- Filter In-built 50 micron filter & magnet assembly
